FOREWORD

This annual report about the year 2009 contains information on publications, seminars and guests. The report serves mainly as reference and documentation for accomplished activities. Detailed information is available on our homepage: www.dcamm.dk and on the homepages of the cooperating departments.

This year only 3 DCAMM reports were published on our web-page. Due to the limited interest we have decided to discontinue the publication of DCAMM reports. No doubt the reports have had a great influence on the impact of research from DCAMM in the past but the internet and rapid publication possibilities elsewhere have declined its importance.

The DCAMM Research School receives funding from Forskeruddannelsesudvalget (FUU) under the Ministry of Science, Technology and Innovation, for course activities and scholarship programmes for visiting students and postdocs. The school organized seven special, intensive courses in 2009, in addition to the standard courses at DTU and AAU. The courses attracted 163 participants, and of these 59 were from abroad. Thus the School continues to maintain its strong international profile. The School also ensured special fellowships for full Ph.D. projects from FUU, including international fellowships in close collaboration with industry. Details on the activities of the School and on courses for 2010 can be found on the DCAMM website.

DCAMM's 12th Symposium was held at Sørup Herregård near Ringsted with the participation of 106 members.

DCAMM's 40th anniversary was celebrated on November 27th. The event held at DTU included presentations by Pauli Pedersen "40 years of DCAMM history", Ole Christensen – "Wavelets – a mathematical microscope", Poul Scheel Larsen – "Thermodynamics – Historic developments, some applications and pitfalls" and last but not least the "DCAMM Annual Speaker" Norman Fleck from Cambridge who spoke on "Strain gradient plasticity theories – theory vs. experiment". The lectures were followed by a festive banquet dinner.

As of Jan. 1, 2010, the departments cooperating within DCAMM are:
from **Technical University of Denmark**:

IMM: Dept. of Informatics and Mathematical Modelling

MAT: Dept. of Mathematics

MEK: Dept. of Mechanical Engineering
(Solid Mechanics, Fluid Mechanics, Manufacturing Engineering,
Materials and Surface Engineering, Maritime Engineering, Thermal
Energy Systems)

Risø: National Laboratory of sustainable Energy

from **Aalborg University**:

IBA: Department of Civil Engineering

ME: Department of Mechanical Engineering

I thank our international contacts for their support and inspirations.

Ole Sigmund

1. OBITUARY FOR FRITHIOF NIORDSON

The founder of DCAMM, Frithiof Niordson sadly passed away in the fall of 2009. He was born in 1922 of a Russian mother and a Swedish father. He studied at KTH in Stockholm and then did a PhD with William Prager at Brown University in the United States; however, from 1958 onwards Frithiof Niordson was a full professor at the Technical University of Denmark (DTU). His scholarly research covered a wide range of topics in applied and computational mechanics, including vibrations, stability, inverse eigenvalue problems, the theory of plates and shells and structural optimisation. He also played major roles both in Denmark and internationally, being the driving force behind the development of the Danish Center for Applied Mathematics and Mechanics (of which he was secretary from its inception in 1969 until 1992) and serving with great distinction as Secretary-General (1968-1976), President (1976-1980) and Vice-President (1980-1984) of IUTAM. He had many international collaborators and was instrumental in enabling younger Danish mechanics scholars to develop their international careers. He will be sorely missed.

(by Niels Olhoff and Tim Pedley)

2. MEMBERS 2009

41 professors
107 scientific members at the six cooperating departments at the Center
111 Ph.D.-students

28 elected members
9 foreign members

(A complete list of names is given in the Appendix).
