

FOREWORD

This annual report about the year 2006 contains information on publications, seminars and guests.

The report serves mainly as reference and documentation for accomplished activities. Information on the actual activities as well as lists of older DCAMM reports and DCAMM S-reports are available on our homepage: www.dcamm.dk and on the homepages of the cooperating departments of the center.

The members are reminded that the orange DCAMM reports that earlier have been sent out to members have been substituted by electronic reports that can be downloaded by members of DCAMM from the DCAMM web-site www.dcamm.dk. The annual report will still be mailed in a paper version.

The DCAMM Research School is a Research School that lives up to the national standards set up by Forskeruddannelsesudvalget (FUU) under the Ministry of Science, Technology and Innovation. As of Jan. 1, 2006, Around 60 Ph.D. students are attached to the School. The School organized seven special, intensive courses in 2006, in addition to the standard courses given in the normal semester system for teaching at DTU and AAU. For the next 5 years a high level of activities will be possible as the School in 2006 was fortunate to be able to obtain substantial funding from FUU for course activities and scholarship programmes for visiting students and postdocs. The School also secured a number of special fellowships for full Ph.D. projects from FUU, including international fellowships which will be carried out in close collaboration with foreign universities. Details on the activities of the school and on courses for 2007 can also be found on the DCAMM website.

In 2006, DCAMM also initiated a new concept named the “DCAMM Annual Speaker”. This consists in inviting a leading international researcher to give a number of lectures at the Technical University of Denmark and at Aalborg University, both to disseminate mechanics to a broader audience as well as to give more specialist presentation for Ph.D. students. In 2006, Professor Hassan Aref kindly agreed to serve the role as our first DCAMM Annual Speaker, and we were pleased to see that the initiative was backed by a big and lively audience at the lectures which were given late in the year

As of Jan. 1, 2007, the departments cooperating within DCAMM are:

from Technical University of Denmark:

IMM: Dept. of Informatics and Mathematical Modelling
MAT: Dept. of Mathematics
MEK-ET: Dept. of Mechanical Engineering, Energy Engineering
MEK-FM: Dept. of Mechanical Engineering, Fluid Mechanics
MEK-FAM: Dept. of Mechanical Engineering, Solid Mechanics
MEK-SKK: Dept. of Mechanical Engineering, Maritime Engineering

from Aalborg University:

IBA-AAU: Department of Civil Engineering
IME-AAU: Institute of Mechanical Engineering

I thank our international contacts for their support and inspirations.

Ole Sigmund
