GENERAL INFORMATION

AIM: The aim of the internal DCAMM Symposia is to promote the contact between members of DCAMM, especially the contact to Ph.D.-students and elected §8-members.

PRESENTATIONS: Based on the submitted contributions, the symposium is divided into sections covering the different topics. When submitting contributions (in English) please consider that the audience is a mix of mechanical engineers and applied mathematicians working in a wide range of mechanics related disciplines.

All participating Ph.D.-students are obligated to give presentations about their on-going work. A limited amount of presentations is devoted to talks by regular members. Duration of talks depends on the students study time:

Newly started	10 min. + 5 min. discussion
Second year	10 min. + 5 min. discussion
Third year	15 min. + 5 min. discussion
Non-Ph.D.-stud.	15 min. + 5 min. discussion

Participants who want to use PowerPoint or PDF files for their presentations are requested to submit their presentations to Mathias Stolpe m.stolpe@mat.dtu.dk a week BEFORE the symposium in order to avoid delays between talks.
